

CITRUSCAL MATURITY APP SETUP

V01 3/6/2017

ANDROID SMART PHONES

The instructions below provide information on how to create a shortcut to the CitrusCal Maturity App on the home page of your Android smart phone. Most non-Apple smart phones use the Android operating system. When you access the App from your smart phone you are accessing the same environment that is available from a standard PC.

1	Open web browser on your phone and connect to www.gfap.com.au/citrusmaturity . Screen at left displays.
2	Tap the Menu button in the internet browser (circled on screen at left) to display screen second from left.
3	Click "Add to Home screen" to display screen second from right.
3	Click "Add" to install CitrusCal icon on home screen (right screen with icon circled).
4	Click the icon to display the CitrusCal App as on left screen.

NOTE: Citrus Australia recommends use of Google Chrome to access the App as opposed to the standard browser on the Android phone. Click [here](#) for instructions on how to install Chrome on your Android.
